

The Brace Without a Trace

Did You Know?

It's likely you've already heard about many of the well-known personalities who have had their teeth straightened by braces that are affixed to the back of their teeth. But did you know that your orthodontist can offer you MTM® No•Trace™ orthodontic treatment for a fraction of the cost of many full mouth traditional wire braces? And did you know that MTM No•Trace braces are covered by many dental insurance plans? Learn all about the cost saving advantages of MTM No•Trace braces by visiting our easy-to-understand Insurance Guide at www.MinorToothMovement.com.

An Embraceable You

When it comes to your orthodontic treatment, comfort means more than just a good fit. It means your treatment must also fit your life. MTM® No•Trace™ System is ideal for public and professional figures, people who are athletic or anyone who wants a discrete treatment option. MTM No•Trace braces can usually be applied in less than an hour, and treatment typically concludes in just 12 to 24 weeks. Get the out-of-sight, out-of-mind experience of MTM® and get the smile you've always wanted.

Introducing the Brace Without a Trace

- ✓ Exceptional Comfort
- ✓ Virtually Undetectable
- ✓ Fast Treatment

MTM® No•Trace™ System Works Behind the Scenes

You want your smile to get noticed, not your braces! MTM® No•Trace™ braces are the virtually undetectable orthodontic treatment to comfortably correct your smile in as little as 12-24 weeks.

The MTM No•Trace System uses extremely small, low-profile brackets that rest on the back side of the teeth to achieve minor tooth movement.

MTM No•Trace braces gently guide your teeth into their ideal position with little disruption to your everyday life. MTM No•Trace braces are the discrete treatment you've been waiting for, so don't wait another day to get the smile you've always wanted.

"Fast, affordable and virtually undetectable treatment—now that's worth smiling about!"

Benefits You Can See. Treatment You Can't.

A more beautiful smile is just one of the many benefits of using the MTM® No•Trace™ System. Improved tooth alignment means easier access to the tooth surface during daily cleanings, reducing the chance of unwanted plaque buildup and possible tooth decay. And recent studies from the ADA suggest that a healthy mouth can also help you maintain better overall health.

Am I A Good Fit?

MTM® No•Trace™ braces address these common misalignments:

Spacing Too much space between teeth		1
Crowding Not enough space between teeth		2
Midline Correction Teeth off center		3
Tipping Teeth tip outward or inward		4
Rotation Teeth are turned		5
Intrusion/Extrusion Teeth sit too high or too low		6

Ask your orthodontist if the MTM No•Trace System is right for you.
